Dear Sir,

Project: Dragon LNG Import Terminal
Contract: Engineering, Procurement & Construction of the Dragon LNG Import Terminal
Contract No: 028
Subject: Statement of Recommendation

TO WHOM IT MAY CONCERN

Vale Fencing Ltd recently completed a £2m project, which ran over a 2-year period for Whessoe Volker- Stevin J.V. at Dragon LNG, Milford Haven.

The project entailed the design, planning, supply and installation of a complete perimeter security system involving electrified perimeter fencing, power operated gates and access control with CCTV interface.

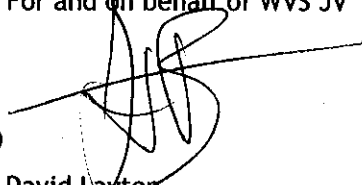

We feel that the project in its entirety was managed successfully and with the highest level of professionalism. Vale Fencing accommodated our agreed schedule of works and always demonstrated the flexibility required when undertaking a project of this nature.

Vale Fencings approach to the Health & Safety and Environmental project requirements was excellent and the administration of all Health & Safety procedures were fulfilled without failure.

We would have no hesitation in recommending Vale Fencing Ltd for any future projects of this type.

If you have any further queries please do not hesitate to contact the undersigned to discuss.

Yours faithfully
For and on behalf of WVS JV

P.P
David Layton
